October 2022

Next Members Meeting Tuesday 11 October @ 7.30pm

Black & Decker® U-3
—packs more power—does more jobs!

GEARED CHUCK same as used by industry for extra holding power and accuracy.

HIGH-QUALITY HELICAL GEARS give quieter, smoother flow of power from motor.

FAMOUS B&D-BUILT MOTOR has 45% more power, 100% greater torque (turning force).

SLIM, TRIM HANDLE is shaped to fit the hand for better control. Bright, highly polished housing stays new looking.

Insist on Black & Decker's U-3
—the 1/4" drill with the quality difference

3-WIRE CABLE has industrial-type ground wire for extra safety in operation.

Look for the 3-prong plug

The advertisement features a central image of the Black & Decker U-3 drill with arrows pointing to various components. Surrounding this are four smaller inset images: a geared chuck, helical gears, the motor, and the handle. A callout bubble on the left emphasizes the quality of the U-3 drill, and a callout box at the bottom right points to the 3-prong plug on the power cord.

Workshop 9.00am. to 1.30pm

FEE \$60

#Enrol Online	All enrolments are online
#What to wear	Enclosed shoes
# <i>What not to wear</i>	Heavy Industrial clothing
# <i>What to bring</i>	Lunch
# <i>Can I bring my tools?</i>	Yes, but “use TTTG tools”

Lunch is around 12.30pm and the class finishes by 1.30pm.
There are no chairs to minimise “trip hazards.”

Class size is limited to 6 person so don't miss out!

Tell us what classes you want?

The old favourite workshops will always be repeated but we TTTG is open to suggestions.

TTTG teaches old skills but accepts new ideas!

Age and gender don't determine skill level.

Attitude and effort are the key to competence.

Workshops to learn skills and not to waste money.
